Animal and Plant Health Inspection Service

TITLE: Importation of Table Eggs from Regions Where Newcastle Disease Exists and Exportation of Poultry and Hatching Eggs

OMB CONTROL NUMBER: 0579-0328

SUMMARY OF COLLECTION: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. Veterinary Services, a program with the Animal and Plant Health Inspection Service (APHIS) is responsible for administering regulations intended to prevent the dissemination of animal disease within the United States. Regulations in title 9, Code of Federal Regulations, section 94.6 deal specifically with the importation of table eggs from certain regions that may pose a risk of introducing Newcastle Disease (ND) into the United States.

NEED AND USE OF THE INFORMATION: Although this collection applies to any region where ND is considered to exist, the United States is not currently importing table eggs from any ND-affected region. APHIS requires the following regarding imported table eggs: (1) a certificate for table eggs from ND-affected regions; and (2) a government seal issued by the veterinarian accredited by the national government who signed the certificate. APHIS will also use form VS-17-6, Export Health Certificate for Poultry or Hatching Eggs for Export. If the information were collected less frequently or not collected at all, APHIS would be unable to establish an effective defense against the incursion of ND from table eggs imported from ND-affected regions. This would cause serious economic consequences for U.S. poultry industry, which would be unable to export poultry and hatching eggs.
